PSYCHOEDUCATIONAL, NEUROPSYCHOLOGICAL & PSYCHOLOGICAL TESTING

*Comprehensive Diagnostic Evaluations
for Children & Teens*

SPS Diagnostics & Treatment provides comprehensive psychological, neuropsychological, and psychoeducational evaluations for children and adolescents experiencing learning, attention, developmental, behavioral, emotional, or cognitive concerns. Our goal is to help families better understand how a student learns, thinks, functions, and experiences the world, and translate evaluation findings into practical recommendations.

WHEN A FAMILY MAY BENEFIT FROM A PRIVATE EVALUATION

A comprehensive evaluation may be helpful when:

- A student is struggling academically despite intervention or support
- Attention or executive-functioning difficulties are affecting school performance
- Autism or another neurodevelopmental difference is suspected
- Academic performance does not appear consistent with the student's abilities
- Emotional or behavioral concerns are interfering with learning

CONTACT US TO FIND OUT MORE

SPS accepts Aetna, Anthem, BCBS, BSW, Cigna, Carelon, Humana, Triwest, Optum, Oxford, UMR, UHC and more. We also offer Care Credit and out-of-network benefit coordination.
